

MESHPRO CUSTOM

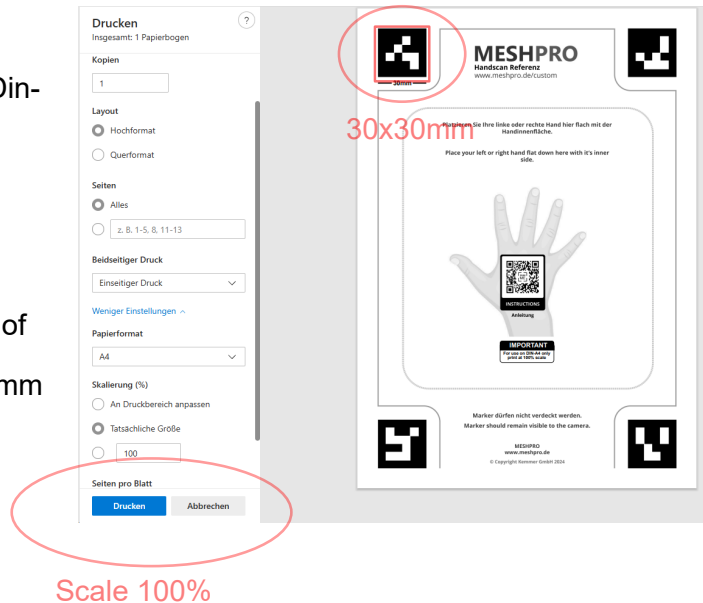

Handscan instructions

With the MESHPRO Handscan you can have your hand measured to obtain a customized MESHPRO grip.

- 1 Print our reference sheet on a Din-A4 or US letter.

Make sure you use the correct scaling "Actual size" / 100%.

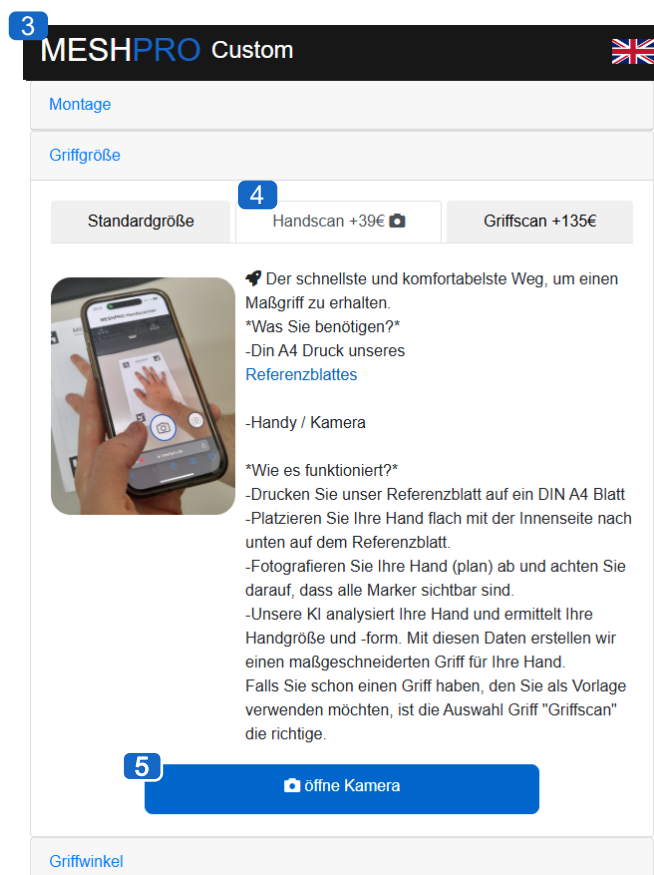

- 2 You can then check the scaling of your printout by measuring the markers. These must be 30x30mm in size.

- 3 Visit meshpro.de/custom with your smartphone or tablet.

- 4 Select "Handscan" for grip size.

- 5 Open the camera using the blue button.

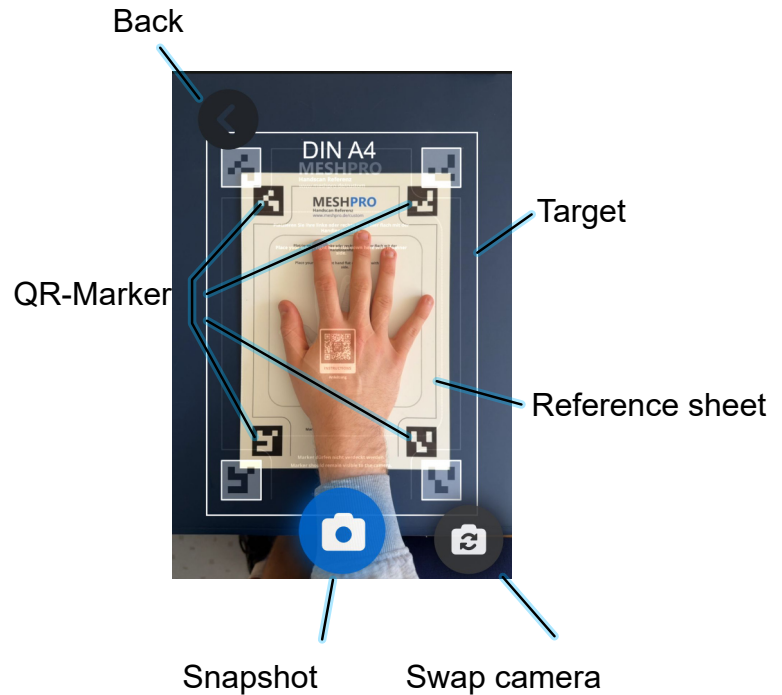

MESHPRO CUSTOM

- 6** Place your hand in the center of the reference sheet. Make sure that all QR markers are visible.

Right-handed -> right hand

Left-handed -> left hand

- 7** Try to capture the reference sheet as well as possible in the target area with your camera.

Common errors during hand scan

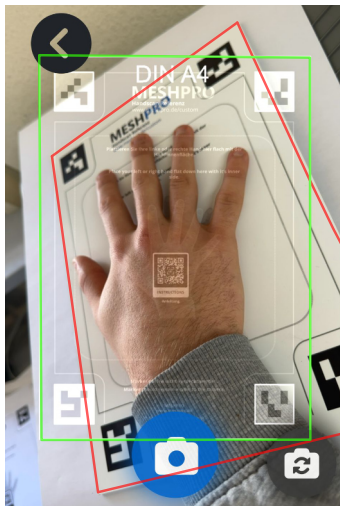

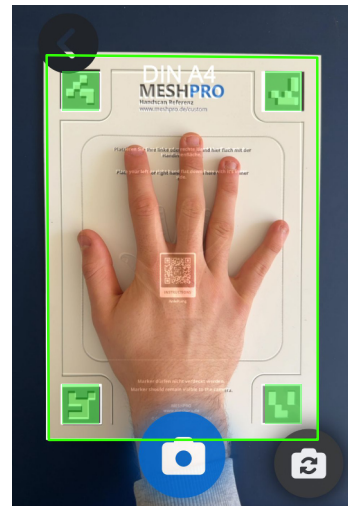

Image distorted. Reference sheet not within the target range.

Marker hidden at bottom right.

All QR markers visible.
Reference sheet in the target area.

MESHPRO CUSTOM

7 Your handscan has been successfully completed. You can now order your handle or make further changes.

We look forward to your order and remain with "Gut Schuss".
